Briody Health Care Facility Selects 6N Systems, Inc. for Electronic Medical Records

Wilton, NY – September 10, 2009 –6N Systems, a long-term care EMR software provider, announced today that the Briody Health Care Facility has chosen 6N to provide the 6N EMR™ (Electronic Medical Record) and 6N Financials™ billing system for their long term care facility.

6N Systems' EMR™ software is an integral part of a resident's larger health care network and provides clinicians in long term care organizations with the information they need to improve safety, efficiency and quality of care. The 6N EMR™ includes a full suite of clinical features including electronic prescriptions, resident charts, and reporting tools, all designed to streamline data management and improve communication between caregivers, and help facilities better manage resident care.

Ann Briody Petock, administrator of the facility, states "implementing the 6N software system will enable our facility to enhance the documentation of care we provide, streamline communication between clinicians and help us to continue to provide exceptional care to our residents. We are very excited to be able to provide this cutting edge technology to the staff and residents."

Due to the increase in population of seniors, and the need for better medical care, the federal government is placing heavy emphasis on electronic medical records (EMRs) and driving the establishment of universal standards. According to the 2009 HIMSS Leadership survey, reducing medical errors and improving quality care are the top reasons for implementing information technology at healthcare delivery systems across the country: "Nearly two-thirds of respondents believe that IT can have a positive impact on patient care, either by reducing medical errors or through an improvement in clinical/quality outcomes." Source: http://www.himss.org/2009Survey/healthcareCIO_final08.asp

"We are excited to work with the staff at Briody to implement a software system that can help caregivers have access to the right information for the best resident care," said Darcy Baldwin, Chief Operating Officer, 6N Systems, Inc. "Electronic Medical Records are proven to help reduce

medical errors and also help ease the burden of paperwork on clinical staff. The EMR is key to driving quality improvement for our seniors.”

With these factors in mind, 6N Systems is poised to capture this growing market by collaborating with long term care industry professionals and creating a product that will fit the needs of these providers, by increasing their ability to manage larger populations of seniors, while focusing their efforts on providing the best care possible.

About 6N Systems

6N Systems gives long term care providers the most complete financial and clinical tools to streamline workflow, information management and operations. Using the latest Microsoft™ technology, 6N’s EMR™ offers fully integrated orders, workflow, dashboards, point-of-care documentation, charting and enterprise reporting tools that help providers improve quality and increase ROI. Get as much out of your software as you put into it. Visit us at www.6NSystems.com.

About Briody Health Care Facility

Briody Health Care Facility is the oldest family owned and operated nursing facility in Western New York. For over 60 years, the Briody family has provided a highly personalized level of care to all residents. We are well qualified to meet many special needs including recuperation from illnesses, short-term rehabilitation, or long-term care. We are very proud to have been rated #1 in an in-depth investigation conducted by the Buffalo News, which analyzed and ranked the 93 facilities in the eight counties of Western New York.
