6N Systems Licenses InfoScan Formulary Database™ for Improved e-Prescription Management

Wilton, NY – October 15, 2008 –6N Systems, a long-term care EMR software provider, announced that it has licensed the InfoScan Formulary Database™, a comprehensive integration of formulary information from over 5,000 healthcare plans, for use in the 6N EMR™ (Electronic Medical Record). The InfoScan Formulary Database™ (IFDB) will be integrated into the Computerized Physician Order Entry (CPOE) and e-Prescription piece of the 6N EMR™, an electronic medical record for long term care.

With information collected from over 5,000 plans across the United States, the InfoScan Formulary Database™ offers a number of benefits for e-Prescribing. When a doctor orders a medication, they are now able to access information that not only allows them to select the medication best suited to the patient's health, but also for their health plan. This saves the patient time and money at the pharmacy, and saves doctors time by eliminating the need for pharmacy callbacks.

The database includes all State Medicaid formularies, information from managed care, pharmacy benefit management, health maintenance organizations (HMOs), preferred provider organizations (PPOs) and over 1000 Medicare Part D plans.

"We are very excited about the value that our new relationship with Medimedia is adding to our EMR product," said Bill Kilburn, Chief Technology Officer for 6N Systems. "By providing drug plan formulary information at the time a medication is ordered, we are enabling our users to make an informed decision in prescribing the most cost-effective therapy for their patients."

6N Systems' EMR™ software is an integral part of a resident's larger health care network and provides clinicians in long term care organizations with the information they need to improve safety, efficiency and quality of care. The 6N EMR™ includes a full suite of clinical features including orders, resident charts, and custom assessment and reporting tools, all designed to streamline data management and improve communication and quality.

About 6N Systems

6N Systems gives long term care providers the most complete financial and clinical tools to streamline workflow, information management and operations. Using the latest Microsoft™ technology, 6N's
