# Get a complete picture of your residents' health.

6N Systems, Inc. EMR™ (Electronic Medical Record) was developed specifically to serve the needs of long-term care organizations. This comprehensive clinical software allows caregivers to get a complete picture of a resident's health at any time, from anywhere, from one system.

## 6N EMR™

The 6N EMR™ includes a full suite of clinical and management tools that assist long term care organizations with streamlining data management to measure outcomes, identify problem areas, and help providers take concrete steps to improve quality of care.

Our software is an integral part of a resident's larger health care network, by providing clinicians and physicians at long term care organizations with the information they need at point of care for improved safety and efficiency. With built-in tools for information sharing, everyone has the secure access they need – when they need it.

The 6N EMR™ is built from the ground up with flexible Microsoft® technology. This means that we have the flexibility to change with you as regulations shift and requirements change. And with long term care experience, we really understand that each facility has unique needs. That is why we made our system configurable – allowing you to customize assessments, workflow, charting and reporting – making it the perfect fit for your organization.

## Complete Functionality

While other vendors promise pieces of an EMR, 6N delivers the entire package – giving you all functionality in one centralized location – saving you the headache of integrating and managing multiple systems. And because our system is built with Microsoft® tools, we have the capability to add onto our system efficiently and smoothly, without any additional costly upgrades.

Information at the resident level ultimately informs decisions for your organization as a whole – in quality initiatives, performance improvement, and best practices. Our value lies in the flexibility to customize assessments, charts, orders, reports and dashboards to fit your organization. So not only can you collect and analyze data on a specific pressure ulcer or incident, but track and report on these statistics across your entire organization.

## Exceptional Technology

Built from the ground up with the latest Microsoft® technology, 6N Systems offers you the most flexible and reliable system available today. With experience in long term care, we know that regulations are always changing. 6N EMR™ was built with this in mind, so we are ready to adapt.

With our Application Service Provider (ASP) model, 6N hosts and manages the application, as well as the servers, requiring less upfront cost for infrastructure and less maintenance hassle. 6N handles all of the servers, updates, system maintenance and upgrades. Our system is also tablet-enabled for point-of-care use.

\* Microsoft is a registered trademark of Microsoft Corporation in the United States and /or other countries.

## Long Term Care Expertise

6N is at the forefront of what matters to long term care. Our dedicated team has over 50 years combined experience in all aspects of long term healthcare clinical and financial management. We have always worked with clinicians at all levels to design our software, ensuring it is user-friendly, and relevant to the specific needs of long term care.

With long term care experience, we know that each facility is unique. That is why we created software that can be customized. We don't force you to work within a hardcoded system – we are flexible.

## Friendly to Work With

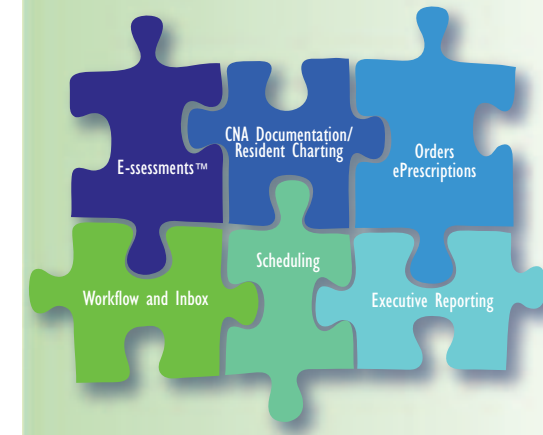

The 6N EMR™ was developed with clinicians specifically to address the needs of long term care facilities, which is why our product is more relevant and user-friendly to long term care clinicians. We give you a complete system to help you reduce paperwork, and increase your time with residents.

Known to all of our clients for our “people-centered” approach, we provide the support and training you need to get your EMR project off the ground. Dedicated Project Managers will stick with you from start to finish, and will help your staff feel comfortable with the transition from paper to paperless. And because we have always worked with the people who use our software to help us design our software, it is easy to use.

## Experience the Difference

Founded in 2001, 6N Systems, Inc.™ provides a suite of software products and services for skilled nursing facilities, assisted and independent living organizations, and adult day care centers. In addition to 6N EMR™, we offer 6N Essentials™, an integrated census, clinical and financial system for multiple care settings.

6N Systems offers our clients the best technology, combined with the experience and input of clinical staff – making the 6N EMR™ the most comprehensive system on the market today.

## 6N EMR™ Includes:

**E-assessments™:** Effectively manage clinical data with a standard form library of assessments, and create customized forms for complete capture of all resident information, real-time access to clinical records and on-demand reporting.

**CNA Documentation / Resident Charting:** Centralize resident charting with full revision & history tracking and digital dashboards for quality-assurance monitoring. Review assessments, MDS, progress notes and careplans - print on demand at any time.

**Workflow & Inbox:** Automate workflow for improved management of day to day operations and communication including alerts, task assignments and document approval, MDS decision support.

**Orders/ePrescriptions:** Ensure safety and consistency with access to the resident's full medical record & eMAR / eTAR, for a more cost effective way to administer, track and reconcile medications. Create order sentences, check drug and allergy interactions, and customize orders.

**Scheduling:** Organize resources and manage clinical and resident schedules with automated, intelligent scheduling.

**Executive Reporting:** Save time and money by analyzing critical data for better management of clinical information and survey preparation – across your organization.
